

COVID-19 RESPONSE PROCEDURES

STAFF TAKE THESE STEPS WHEN ANYONE IN A FACILITY DISPLAYS SYMPTOMS OF COVID-19

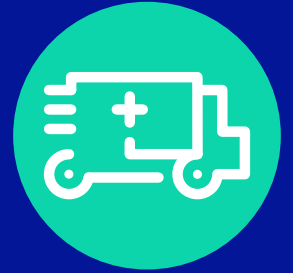

CONTAIN

The patient will immediately be equipped with a medical mask and medically evaluated.

ALERT

At the same time, the shift commander will be alerted so movement is stopped to and from the area.

TEST

The patient will be tested using the ID NOW Rapid Test device. If negative, the patient will be isolated pending a follow up test by the state lab. If positive, the patient will be isolated until they are medically cleared.

QUARANTINE

People who were exposed to the patient will be quarantined and undergo medical screening twice a day. Staff will self-quarantine in their homes.

CLEAN

Cleaning teams will continue to disinfect common surfaces according to a documented schedule.
